Task Analysis and Wireframe Design for Food Ordering Application

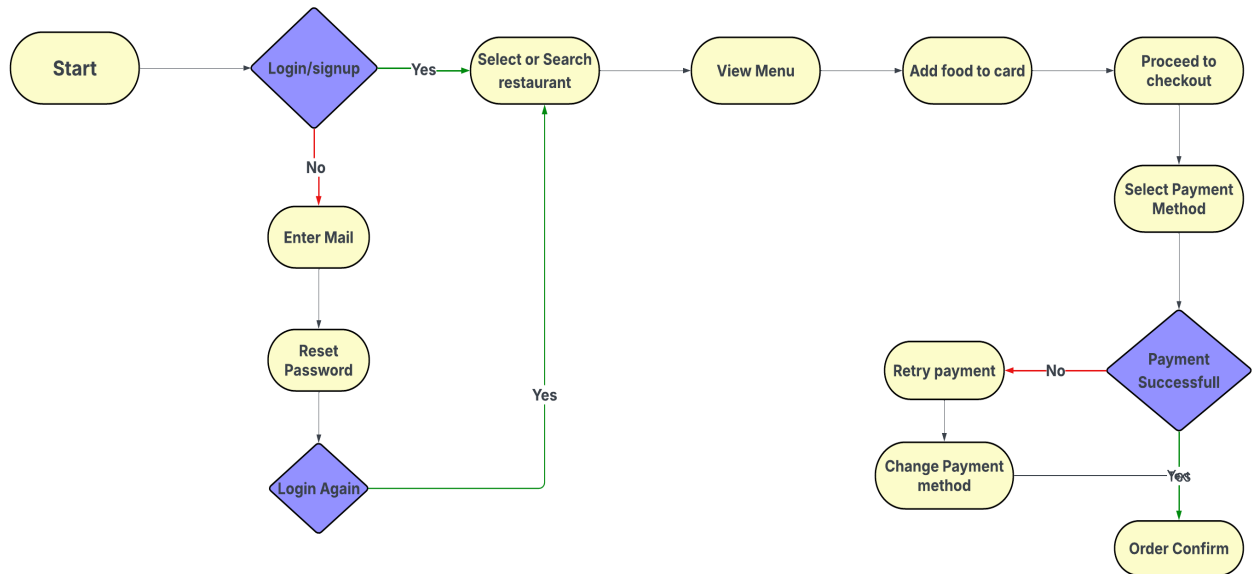

The food ordering application allows users to browse restaurants, select food items, add them to the cart, and place orders using different payment methods. The system provides a simple and user-friendly interface for seamless ordering

User Flow

The user flow represents the step-by-step interaction of the user with the application.

Flow Explanation:

- The process starts with login/signup
- If login fails, user resets password and logs in again
- After successful login, user browses restaurants
- User selects items and adds them to cart
- User proceeds to checkout and selects payment method
- If payment fails, user retries or changes method
- If payment succeeds, order is confirmed

Wireframes

Wireframes represent the structure and layout of the application screens.

Screens Designed:

1. Login Screen

- Username and password fields
- Login button

2. Search Screen

- Search bar to find food/restaurants

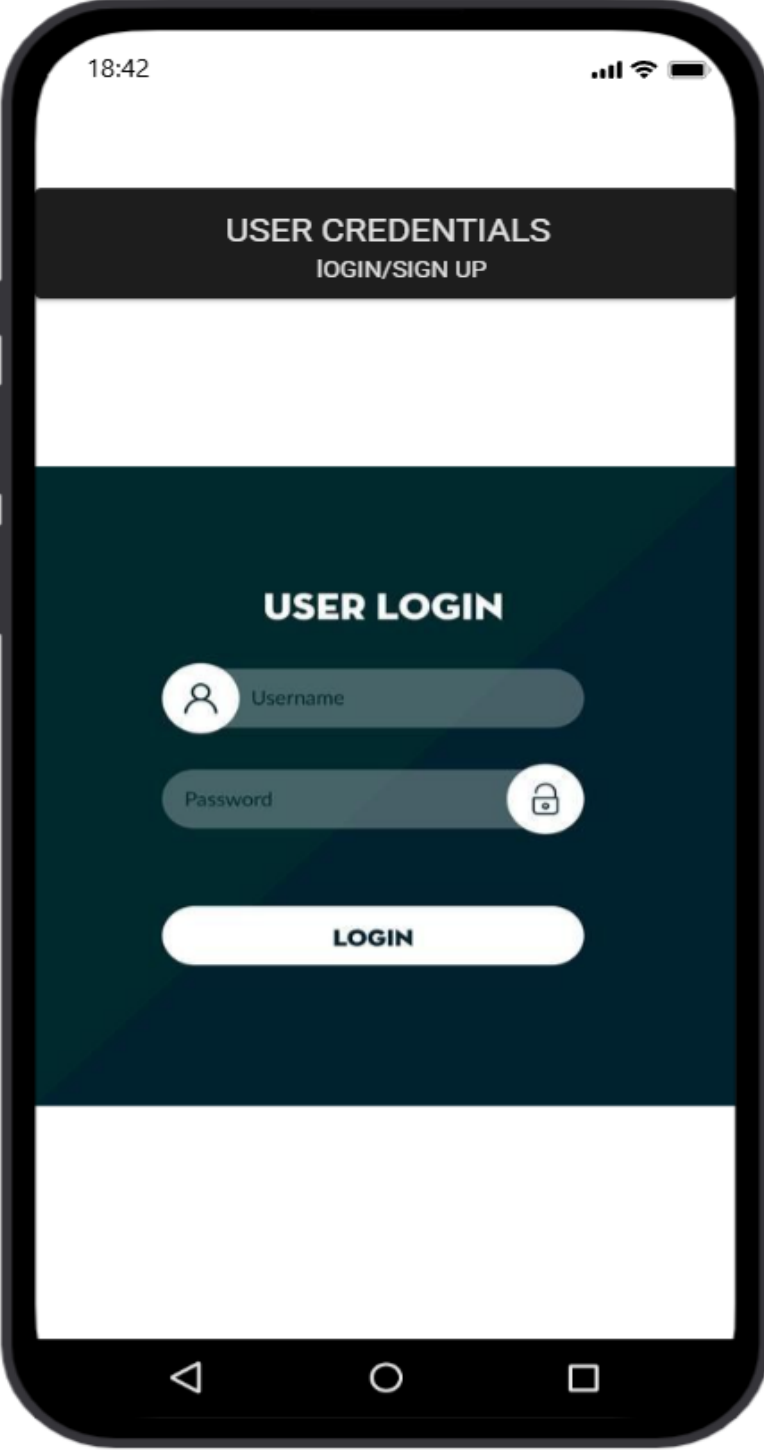

3. Menu Screen

- Displays food items with images and prices
- Add to cart option

4. Cart / Checkout Screen

- Displays selected items
- Quantity adjustment
- Address selection

5. Payment Screen

LOGIN

The image shows a mobile application interface for user login. At the top, the status bar displays the time 18:42, signal strength, and battery level. Below this is a dark header with the text 'USER CREDENTIALS' and 'LOGIN/SIGN UP'. The main content area has a dark teal background with the title 'USER LOGIN'. It contains two input fields: 'Username' with a user icon and 'Password' with a lock icon. A white 'LOGIN' button is positioned below the fields. The bottom of the screen features a white bar with three navigation icons: a triangle, a circle, and a square.
